

The carbon and water functionality of  
the Atlantic forest,  
and comparisons to Amazonian and  
Cerrado's ecosystems

Humberto Rocha

# Those without whom it wouldn't be possible this way

Large Scale Biosphere-  
Atmosphere Experiment  
in Amazonia

Programa FAPESP de  
Pesquisa sobre  
Mudanças Climáticas  
Globais (PFPMCG)

**Students and technicians of Universidade de São Paulo Helber Freitas, Eduardo Gomes, Emilia Brasilio, Nilson Neres, Jonatan Tatsch + muitos outros**

**Embrapa Meio Ambiente Osvaldo Cabral**

**Unicamp and Cena/Usp Carlos Joly, Luiz Martinelli**

**IBt Marcos Aidar + estudantes**

**INPE Carlos Nobre, Rogerio Carneiro**

**Foreign universities (in USA: UCI, UoA, SUNY, Harvard , in Europe: UoE, ULeeds, Alterra)**

# Evapotranspiration

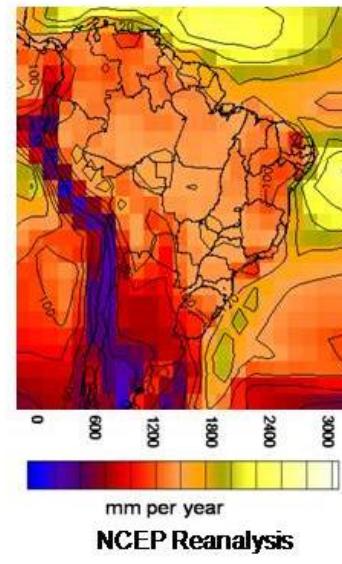

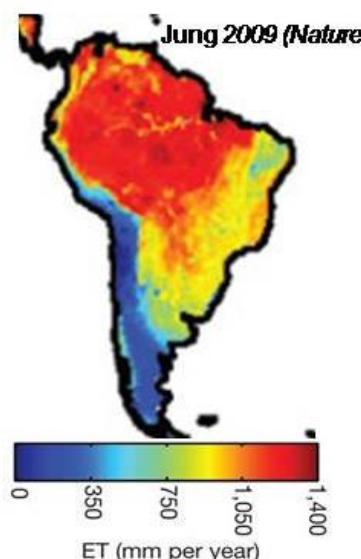

# Evapotranspiration

Data: NCEP/NCAR Reanalysis Project, 1959-1997 Climatologies  
Animation: Department of Geography, University of Oregon, March 2000

Baumgartner & Reichel (1975)

# Which are the big questions here ?

Can we see distinguishable patterns of productivity  
and water use for the different brazillian  
ecosystems?

(this talk)

Does it help us to use models and predict the  
ecosystems' functionality ?
