

Mass Spectrometry in the state of São Paulo

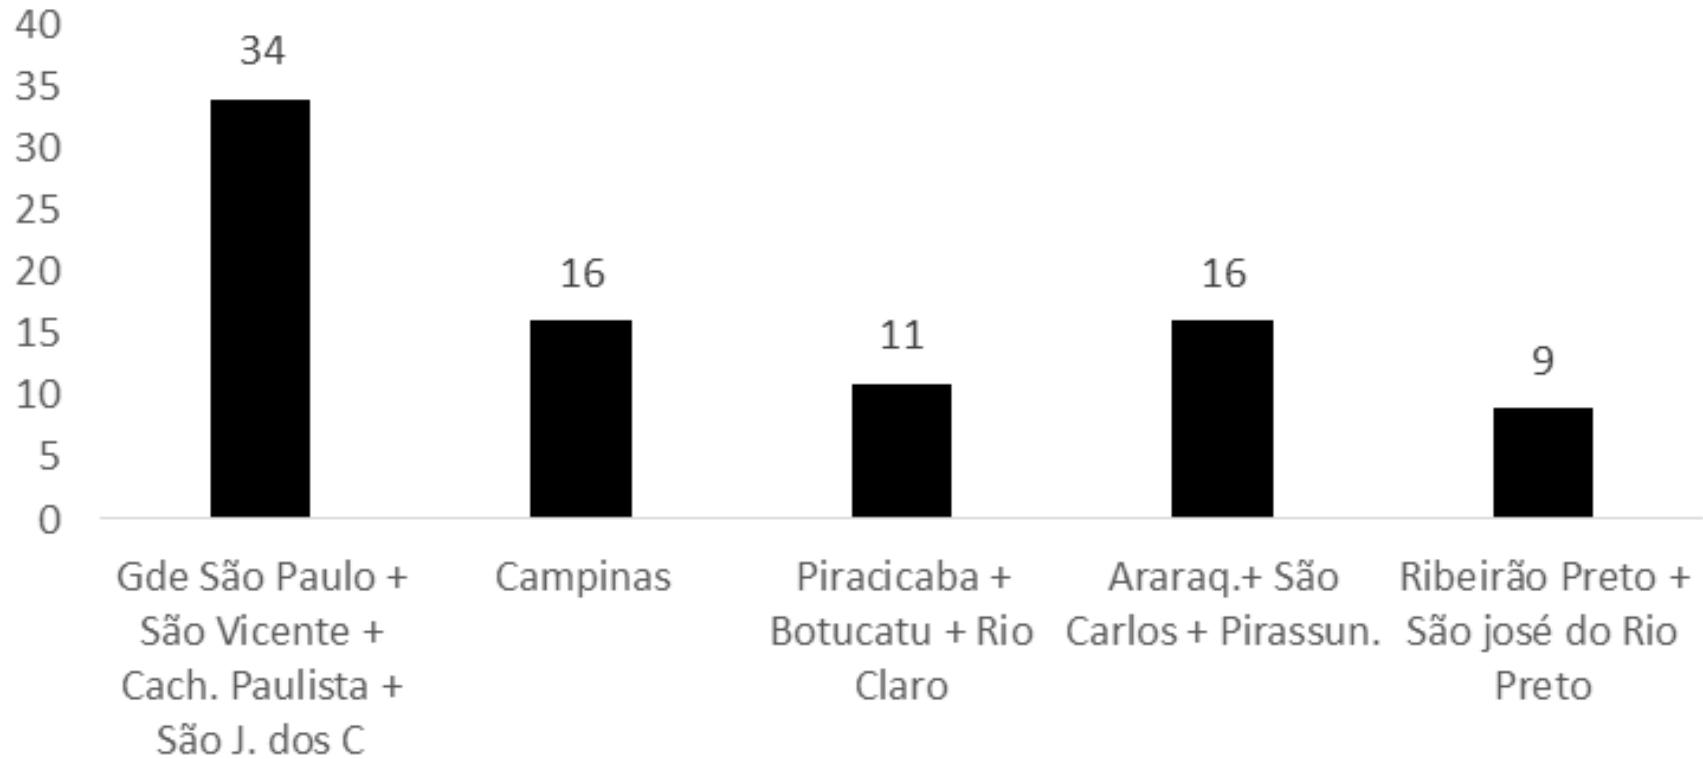

An overview

Carlos H. de Brito Cruz and
José A. Brum
Scientific Directorate
July 2016

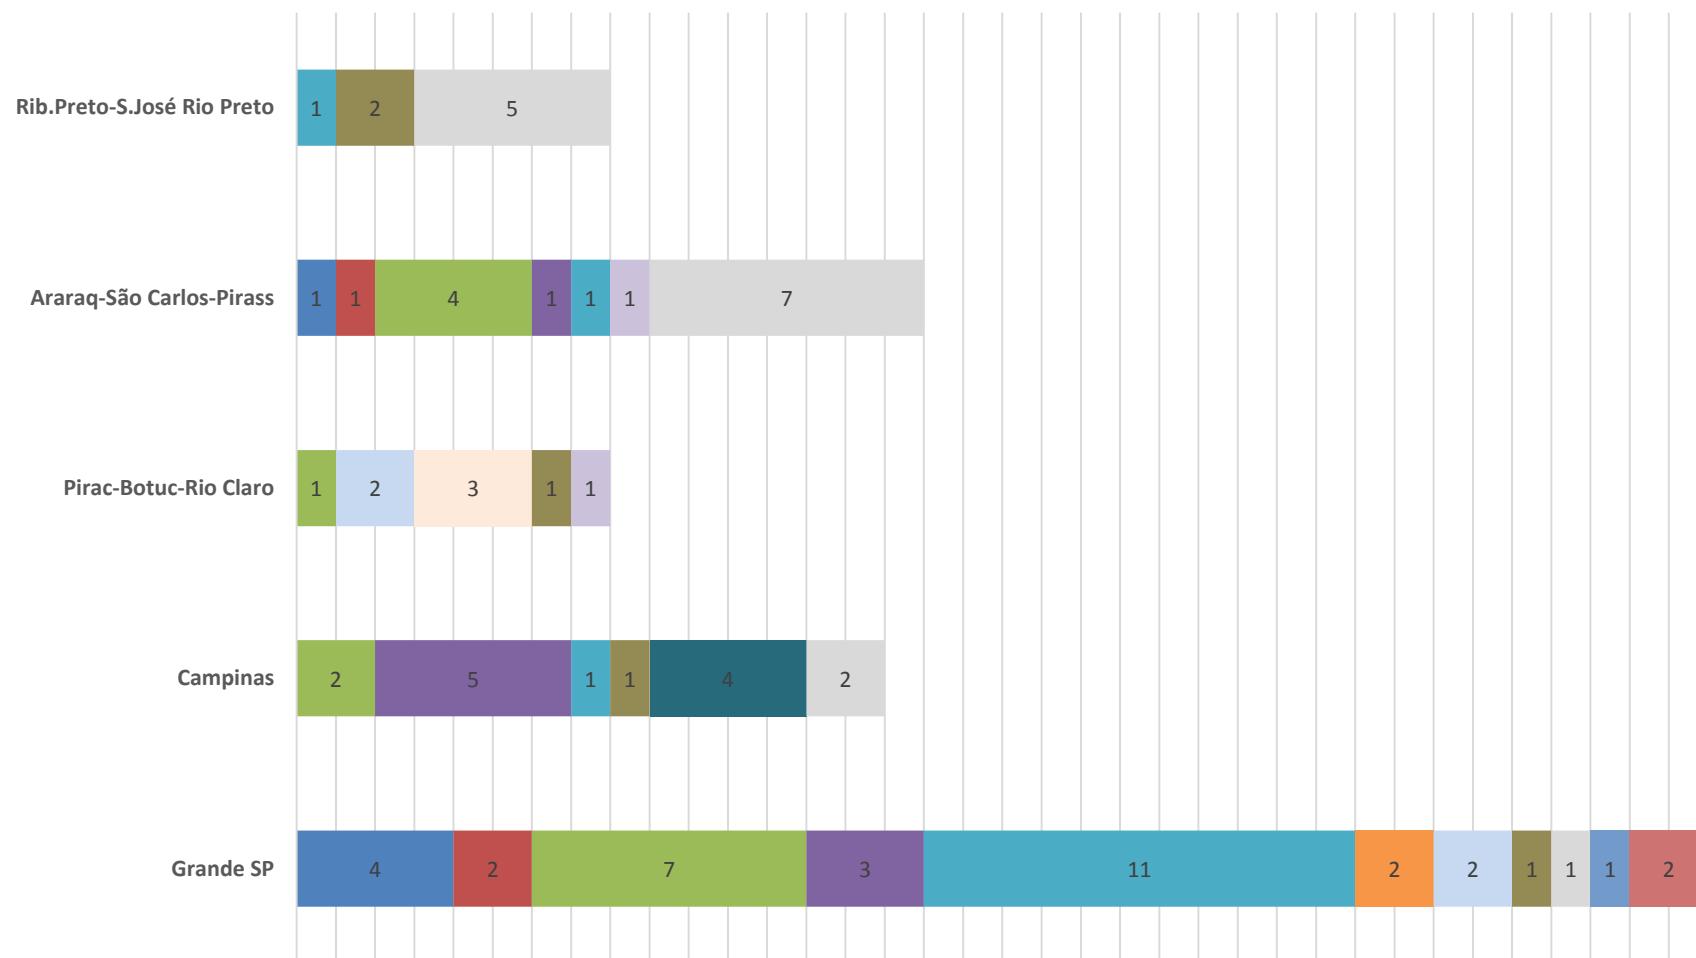

Some numbers

- From 2000 – 2012: 103 mass spectrometers were acquired by FAPESP
 - 17 as multi-user equipment
 - 86 associated to research projects (mainly Young Researcher or Thematic Projects)
- From 2013-2015: 6 mass spectrometers all as multi-user equipment

Geographic distribution of non multi-user equipments

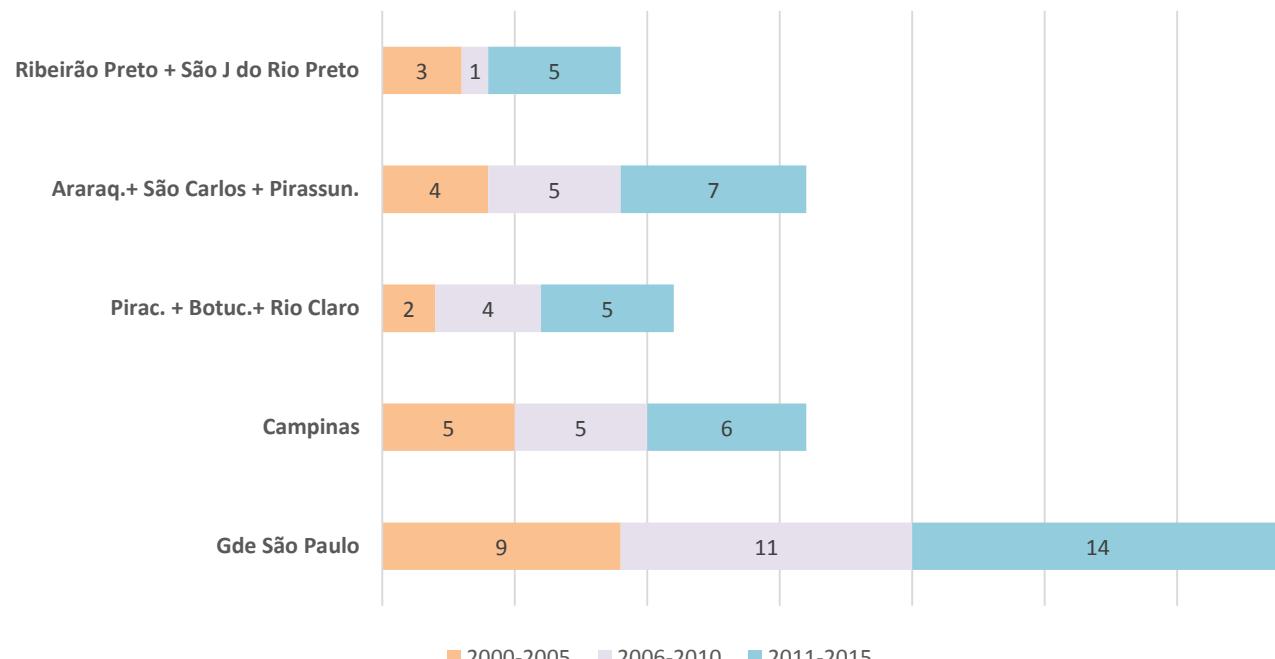

no Multi-User Equipments

- Toxicolog
- Protheom/human met.
- Secon. Met.
- Biomaterials
- New Molecules
- Immunochemistry
- Food
- Fuel
- Non-biologic
- Isotopes
- Various
- Proteins
- Biomass
- Pharmaceuticals

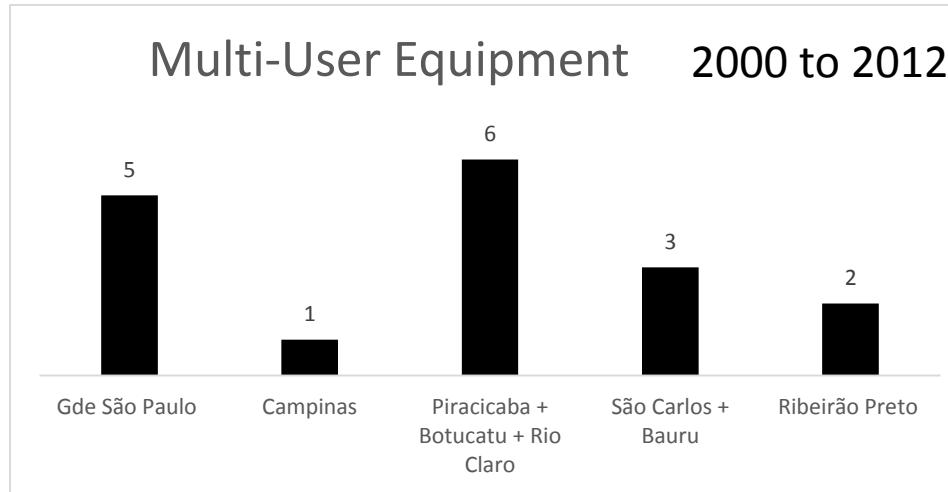

Date the equipment was acquired

Value of the equipment (R\$)

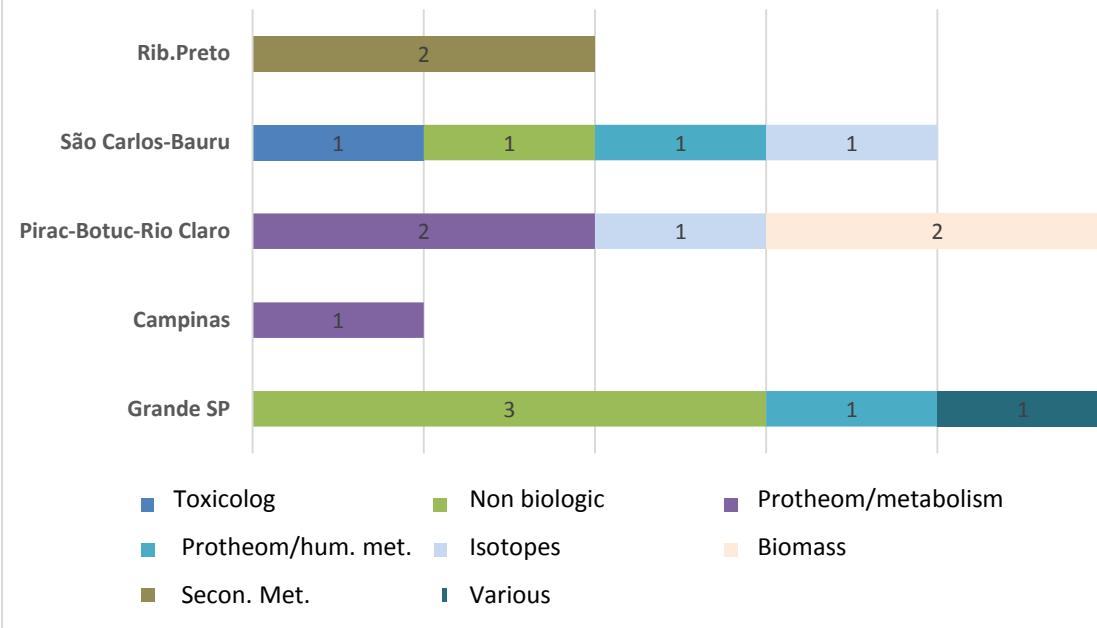

Multi-User Mass Spectrometers

From 2013-2015: Gde São Paulo (2)
Campinas (2)
São Carlos (1)
Ribeirão Preto (1)

Multi-User Equipment 2000-2012

Acquisition: one in 2006, all the others 2010 or later

Themes for discussion

- What is the present role of the facilities in MS?
- What are the new generation of mass spec?
- What are the requirements for their operation?
- Where is the best place to locate the new mass spectrometers?
